

SunTrust's Laurel Springs branch opened in the spring of 2004 and is one of 13 that SunTrust has awarded to CA3 Construction.

The branch was the first ever of a new prototype and as a result of considerable teamwork between CA3, the owner, and architect, the project was completed in 100 days.

Among the new design elements were a new two-story glass entry foyer and several new hi-tech informational displays.

Flagstar Bank is the largest independent savings institution in the state of Michigan as well as one of the nation's leading mortgage lenders.

When the time came for Flagstar to expand south into the Atlanta market, they required a proven and reliable partner to get their branches up and running.

CA3 Construction was called upon to join their expansion team. This Sugarloaf Parkway branch was the first of seven banks CA3 has built for Flagstar.
