

## Medica Stand-Up MRI Homewood, AL Interiors

CA3 completed the buildout of the Medica Stand-Up MRI in 2004.

In order to prepare the space for the MRI, CA3 first completed a complete renovation of an existing 10,000 square foot office building which included exterior façade remodel, lowering a portion of the existing floor slab, raising a portion of the existing roof, upgraded fire sprinkler system, & a redesigned parking lot.

All of this work was done on an accelerated schedule due to the delivery date of the MRI equipment and projected opening date of the office.
